Hiring manager  
At Linus Media Group.

Dear Hiring Manager,

Thank you for the opportunity to apply for the junior back-End developer position at your company. After reviewing some of the requirements for this role it is clear that you are looking for a candidate that is familiar with the tools, and responsibilities of a back-end developer who can also perform their tasks confidently. Given these requirements, I am certain that I have the necessary skills to successfully do the job adeptly and perform above expectations.

I am a fast-learning college student (3.7 GPA, Computer Science) currently attending Monterrey's High Institute of Technology. During the course of my academic career, I also managed to accrue nearly 4 years of work experience and tons of personal projects. I had the privilege of working for GameStop as an assistant store leader, where I learned valuable professional skills such as teamwork and management but more importantly where I was able to become incredibly detail oriented. In both my academic and professional life, I have been consistently praised as diligent by my professors and peers. Whether working on academic, extracurricular, or professional projects, I apply proven analytical, problem-solving, and communication skills, which I hope to leverage into this position at your company.

After reviewing my resume, I hope you will agree that I am the type of competent and competitive candidate you are looking for. I look forward to elaborating on how my specific skills and abilities will benefit your organization. Please contact me at +52 (777) 501-1837 or via email at [Daniel.contact@danderu.com](mailto:Daniel.contact@danderu.com) to arrange a convenient meeting time.

Thank you for your consideration, and I look forward to hearing from you soon.
